

# **VeriConnect**<sup>PSTN</sup>

## Telephone Line Supervision

*Finally a simple, reliable and low cost service is available to address the question; is my telephone connection ok? **VeriConnect**<sup>PSTN</sup> services from ES Source provide piece of mind in knowing that your critical systems can communicate when needed most.*

Verify the telephone line connection to your alarm systems, ATM's, access control systems, digital video systems, or any other critical dialer based reporting systems – assure they will be available when you need them. **VeriConnect**<sup>PSTN</sup> service from ES Source will query your device(s) on a regularly scheduled basis, verifying that the correct device actually answers. Any exceptions, such as no answer, unmatched answer or busy, will be considered an alarm condition. This condition is then reported to your current alarm monitoring center, using the same receiver number and account number used for reporting other alarm events. No additional equipment is required at the premise or at the monitoring center. **VeriConnect**<sup>PSTN</sup> does it all, quickly and automatically. There is no set-up or installation charge, just one low monthly fee.

**Is my telephone  
connection ok?**

Now you'll know...

**VeriConnect**<sup>PSTN</sup> telephone line supervision  
starting at \$2.50 month  
30-day no risk, no obligation free trial
